Result

The Alumni Transition Time From University to Working world

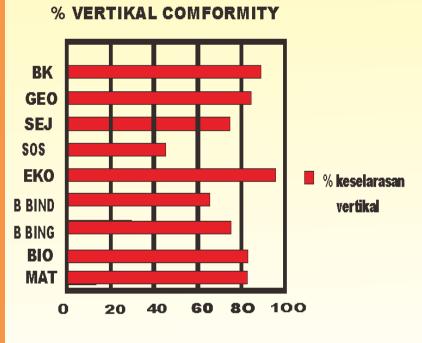

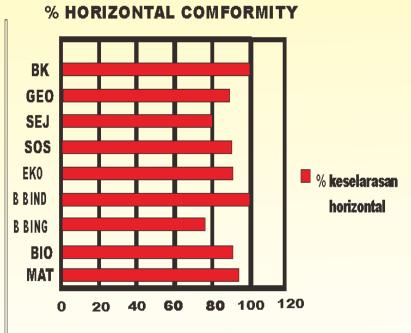

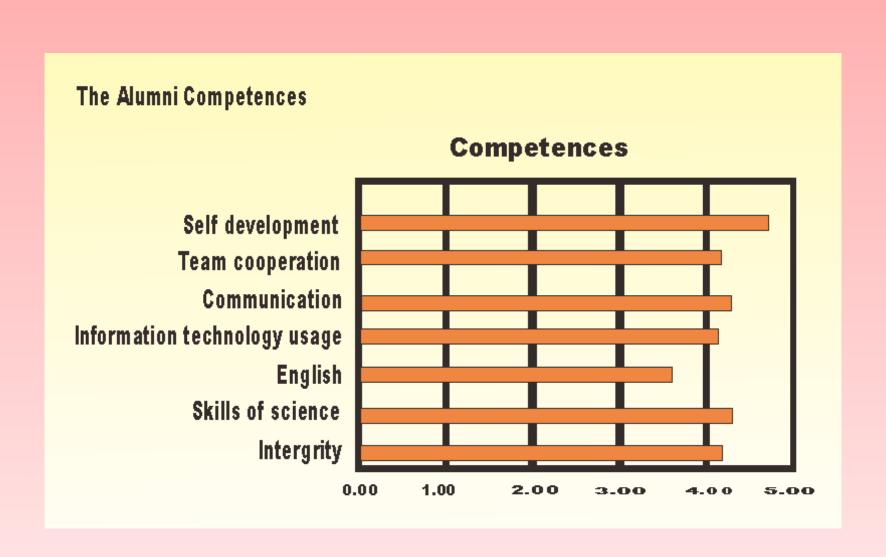

Waiting Time (Median-After Graduate)

The Suitability of Field of Science to Being Occupied Work

Conclusion

From the analysis and discussion, it can be confuded that frist the student's transition time from university to working world is mostly less than 3 months. Second, the suitability of field of science to being occupied work is comformed, i.e. more than half of the alumni occupied working field are pursued to the field of science. Third, the alumni competence needed to be improved is English.
